Parkinson’s disease:
Science, Causes, Symptoms, Diagnosis and Treatment

Michael J. Aminoff, MD, DSC, FRCP

Friday, June 7, 2013
2:00 p.m. to 3:00 p.m.

Dr. Michael Aminoff is an internationally recognized neurologist and expert in diagnosing and treating Parkinson's disease at UCSF Medical Center. His work focuses on particular aspects of Parkinson's disease, including movement and cognitive issues such as disturbances to memory, perception and judgment. He is executive vice chair of Neurology and director of the Parkinson’s Disease and Movement Disorders Clinic. He also is involved in treating and studying epilepsy and other movement disorders.

Dr. Aminoff graduated with honors from University College in London in 1962 and from the University College Hospital Medical School in 1965 in the United Kingdom. He completed post-doctoral training in London teaching hospitals. He joined UCSF Medical Center in 1974. In 2000, Aminoff was awarded a doctorate in science from the University of London. He is board certified in three specialties — electrodiagnostic medicine, clinical neurophysiology and neurology.
